

## Works Notification

April 2017

### Gold Coast Light Rail Stage 2

#### TRACK CONSTRUCTION

Napper Road and Smith Street intersection, Parkwood

**The installation of rail infrastructure has begun in several locations across Stage 2 of the Gold Coast Light Rail. As rail formation activities progress, the installation of track infrastructure will continue between the Gold Coast University Hospital and Helensvale station until late May 2017, weather and construction conditions permitting.**

#### Work will involve:

- Delivery and welding lengths of rail together ahead of being lifted into position.
- Delivery, placement and compacting of rock material called ballast.
- Delivery and placement of concrete sleepers.
- Installation of masts and overhead wire.

#### What to expect

- Increased noise levels and vibration from machinery, particularly during the ballast compaction activity using a specialised machine known as a tamper machine.
- Dust generated from the delivery and placement of ballast and during the ballast formation.

Every effort will be made to keep construction impacts to a minimum. We appreciate your patience during this important work and will continue to update you as work progresses.

## Project information

Gold Coast Light Rail Stage 2 involves the design and construction of a new 7.3km route which runs from Helensvale heavy rail station adjacent to the Gold Coast Line, then adjacent to the Smith Street Motorway to connect with Stage 1 at the Gold Coast University Hospital light rail station.

GoldlinQ's construction contractor CPB Contractors commenced construction in July 2016 and are committed to completing the project in time for the Gold Coast 2018 Commonwealth Games.
